PROFESSIONAL DEVELOPMENT OPPORTUNITY

**Introduction to Combat Systems Engineering**

MITAGS | November 15, 2016 | 0800-1700

This course breaks down the complex Combat Systems Engineering industry - covering requirements gathering and development, functional analysis, design synthesis and system analysis, ship integration and testing, management and planning and alignment. Students have the opportunity to apply the skills they learn in the classroom through group exercises while hearing real-life scenarios from our experienced instructors.
