Promoting Electric Propulsion (PEP) for Small Craft is an educational and competitive program to foster the development of electric boats in the United States. The second PEP competition will be held on July 15, 2020 in conjunction with the Multi-Agency Craft Conference at the United States Coast Guard Yard in Baltimore MD.

Build your electric power boat to compete at PEP!

The race is open to students, academia, businesses, and individuals. Participants in the competition must complete 5 laps of a short <1 mile out-and-back. The competition is open to both manned and unmanned vessels who will race separately, for safety reasons.

As part of PEP, at least five $2,000 mini-grants will be awarded to teams for material costs to encourage innovation in electric power for small watercraft. Top 3 winners will be awarded $3,000, $2,000, and $1,000 in each class.

If you have additional questions, please contact Mike Briscoe at mbriscoe@navalengineers.org.
