What did Allison do very soon after she started her first job?

Which question was she answering when she did soon after getting her first job?
1. What got you into Naval Engineering?
2. What is a fun fact most people don't know about you?
3. What is one engineer/scientist/mathematician dead or alive would you like to meet?
4. If you could engineer your perfect concession stand/food truck, what would it be?
5. Why are you a member of ASNE?

What is a “silly” goal that Allison has?

Which question was she answering when she described this goal?
1. What got you into Naval Engineering?
2. What is a fun fact most people don't know about you?
3. What is one engineer/scientist/mathematician dead or alive would you like to meet?
4. If you could engineer your perfect concession stand/food truck, what would it be?
5. Why are you a member of ASNE?

What was Allison’s original major at Villanova?

Which question was she answering when she mentioned her major at Villanova?
1. What got you into Naval Engineering?
2. What is a fun fact most people don’t know about you?
3. What is one engineer/scientist/mathematician dead or alive would you like to meet?
4. If you could engineer your perfect concession stand/food truck, what would it be?
5. Why are you a member of ASNE?

What does Allison’s college and job experiences show you about engineering majors?

a. You need to decide early what you want to do because it’s important to specialize.

b. Engineers of different types use a lot of the same skills so you can prepare in one area and take a job in another area.

c. You need to study all the time because engineering is the most difficult major.

d. Engineers that work with boats do not require much schooling so anyone can get these jobs.

Was there anything you did not understand in the reading? You can write it here.
