Did you understand how Captain Walker used these words? (Circle any words you did not know.)

- automatic
- code
- constant
- data
- exposure
- indicator
- innovator
- normal
- panels
- priority
- specific
- ultimate

1) What problem does Captain Walker solve? 
   Correct answers range: “boat was broken” to “The EC55 cartridge needed to be loaded again, but time was running out.”

2) How does he solve it? 
   Correct answers range: “Reloaded cartridge” to “Turned off systems so there was enough power for the re-load.”

3) What caused the problem Captain Walker solved? 
   Example answers: “Boiler damaged cables,” “They didn’t care for the ship well enough,” “Insulation was cooked sending bad signals.”

4) At one point, Captain Walker says “we had one shot.” Why did it seem like they had one shot to solve the problem? 
   Example: “The process took 25 minutes and they only had 40 minutes of battery left. So they only had 15 minutes if it failed.”

5) How is a racehorse like a navy ship? 
   If you are good to the them, they are good to you.

6) What is the name of the ship? 
   USS OLDENDORF or “ON”

7) Where did you find this information? 
   The beginning of Captain Walker’s answer

8) What branch of the armed forces was Captain Walker in? 
   US Navy

9) Where did you find this information? 
   Introduction

10) Who is “Happy Samson”? 
    Captain Walker’s horse

11) Was there anything you did not understand in the reading? You can write it here.
